## Value Pricing as a Business Model

---

---

---

---

---

---

---

### What is a Business Model?

How your firm creates value  
for customers, and how you  
capture that value.

---

---

---

---

---

---

---

“Disruptive threats come  
inherently not from new  
technology but from new  
business models.”

Andy Grove, Founder,  
Intel

---

---

---

---

---

---

---

## The Firm of the Past

$$\text{Revenue} = \text{People Hours} \times \text{Efficiency} \times \text{Hourly Rate}$$

We sell time

---

---

---

---

---

---

---

---

## The Firm of the Future

$$\text{Profit} = \text{Intellectual Capital} \times \text{Effectiveness} \times \text{Value Price}$$

Our customers buy intellectual capital

---

---

---

---

---

---

---

---

## A 1% increase change in, yields

---

---

---

---

---

---

---

---

1% Increase Price = Increase Operating Profits

$\frac{1\% \text{ of revenue}}{\text{Current profit}} = 1\% \text{ Windfall}$

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Warren Buffet

"The single most important decision in evaluating a business is pricing power. If you've got the power to raise prices without losing business to a competitor, you've got a very good business. And if you have to have a prayer session before raising the price by 10 percent, then you've got a terrible business."

---

---

---

---

---

---

---

What are you  
really selling?

---

What are your  
customers  
really buying?

---

---

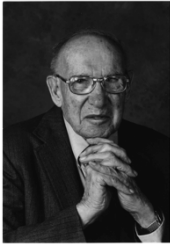

---

---

---

---

---

“The customer never buys a product. By definition the customer buys the satisfaction of a want. He buys value.” - Peter Drucker

---

---

---

---

---

---

---

Charles Revson, Founder,  
Revlon

“When it leaves the  
factory, it’s lipstick.  
But when it crosses  
the counter in the  
department store, it’s  
hope.”

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

## The First Law of Pricing: All Value is Subjective

---

---

---

---

---

---

---

---

## Confusing Cause and Effect

---

---

---

---

---

---

---

---

## A Tale of Two Theories

The **Labor** Theory of Value

The **Subjective** Theory of Value  
(Carl Menger, William Stanley Jevons, and Leon Walras)

---

---

---

---

---

---

---

$$\frac{\text{Salaries} + \text{Overhead} + \text{DNI}}{\text{Expected Hours}} = \text{Hourly Rate}$$

Precise, but precisely wrong

---

---

---

---

---

---

---

### Cost-Plus Pricing

Service → Cost → Price → Value → Customer

Customer → Value → Price → Cost → Service

### Value-Based Pricing

---

---

---

---

---

---

---

## Eight Steps to Implementing Value Pricing

---

---

---

---

---

---

---

### Implementing Value Pricing

#### Eight Steps at a Glance

1. Conversation with Customer
2. Pricing the customer, not the services (CVO/Value Council)
3. Developing and pricing options
4. Effectively present options to customer
5. Option selected codified into an FPA
6. Proper Project Management
7. Scope creep, utilize Change Orders
8. Conduct Pricing After Action Review

---

---

---

---

---

---

---

“Language was invented to ask questions. Answer may be given by grunts and gestures, but questions must be spoken. Humanness came of age when man asked the first question. Social stagnation results not from a lack of answers but from the absence of the impulse to ask questions.”

Eric Hoffer, Longshoreman  
Philosopher

---

---

---

---

---

---

---

## Implementing Value Pricing

### 1. Conversation with customer

---

---

---

---

---

---

---

---

## Implementing Value Pricing

### 1. Conversation with customer

#### Listen > Talk

Opening: "Mr. Customer, we will only undertake this engagement if we can agree, to our mutual satisfaction, that the value we are creating is greater than the price we are charging you. Is that acceptable?"

---

---

---

---

---

---

---

---

## 34 Sources of Client Value

Increase	Reduce	Improve	Create
Revenue	Cost	Productivity	Strategy
Profit	Time/Effort	Process	System
Growth	Complaints	Service	Process
Market	Risk	Information	Business
Share	Turnover	Morale	Product
Retention	Conflict	Image	Service
ROA or ROI	Paperwork	Reputation	Brand
Efficiency		Skills	
Cash Flow		Quality	
Visibility		Loyalty	

---

---

---

---

---

---

---

---

### Spiritual Value

- ◆ Specialist expertise/knowledge
- ◆ Unique social capital
- ◆ Brand/reputation
- ◆ Unique result—creativity & innovation
- ◆ Reducing risk (Guarantee)
- ◆ Pleasant experience (MOTs)
- ◆ Make the Customer “look good”
- ◆ Relationship
- ◆ Knowledge elicitation
- ◆ What else?

---

---

---

---

---

---

---

---

### Implementing Value Pricing

#### 2. Pricing the customer, not the services

#### Role of the Value Council

1. Ensuring that the firm prices on purpose.
2. Constructing and experimenting with various value-based compensation agreements.
3. Assuring continuous learning and teaching the importance of pricing for value.
4. Dealing with price objections from customers.

---

---

---

---

---

---

---

---

### Implementing Value Pricing

#### 2. Form a Value Council and appoint a CVO

#### Role of the Value Council (continued)

5. Keeping the firm focused on tracking customer results instead of firm inputs.
6. Establishing customer selection/deselection criteria.
7. Conducting “after action reviews” at the end of major projects.
8. Providing education throughout firm

---

---

---

---

---

---

---

---

Implementing Value Pricing  
3. Developing and Pricing Options

---

---

---

---

---

---

---

**The Second Law  
of Pricing: All  
Prices are  
Contextual**

---

---

---

---

---

---

---

---

---

---

---

---

---

---

## Behavioral Economics

---

---

---

---

---

---

---

---

1 Yr Sub	Price	Mkt Share	
Web only	\$59	16%	
Print only	\$125	0%	
Print & Web	\$125	84%	

42.8%

1 Yr Sub	Price	Mkt Share	
Web only	\$59	68%	
Print & Web	\$125	32%	

---

---

---

---

---

---

---

---

## Anchoring

---

---

---

---

---

---

---

---

## Framing

---

---

---

---

---

---

---

---

## Implementing Value Pricing 3. Developing and Pricing Options

### The Six Ts of Options

1. Turnaround Time
2. Terms
3. Talent
4. Technology
5. Tailoring
6. Transference

---

---

---

---

---

---

---

---

- Hours x Rate
- Fixed price
- Change orders
- Service guarantee
- Price guarantee
- Payment terms
- Unlimited Access

## Value Price Premiums

---

---

---

---

---

---

---

---

## Implementing Value Pricing

### 4. Effectively present options to customer

#### Presenting your pricing

1. Present your most expensive option first; this is your "anchor price."
2. After stating your price(s), shut up.
3. Use the word "price" instead of "fee."
4. Use the word "agreement" instead of "contract."
5. Use the word "fair," as in "Is this a fair price to you?"
6. Remember to negotiate value, not price.
7. Place a timeline on proposals; no price should last forever.
8. Finite number of price objections—shouldn't we have answers?

---

---

---

---

---

---

---

---

## Implementing Value Pricing

### 5. Fixed Price Agreement (FPA)

#### Elements of an effective FPA

Memorializes the meeting of the minds  
Specifies scope of work  
Includes deadlines, delivery dates, and other milestones  
Details customer's responsibilities for providing information  
Includes payment terms  
Establishes parameters for Change Orders  
Bundles Unlimited Access  
Includes service guarantee and price guarantee

---

---

---

---

---

---

---

---

## Implementing Value Pricing

### 6. Proper Project Management

#### Effective PM

Scope of work  
Who performs work  
Resources needed  
Capacity planning—forward looking, not backwards  
Customer responsibilities and commitments  
Deadlines—duration, not time spent

---

---

---

---

---

---

---

---

## Implementing Value Pricing

### 7. Change Orders

---

---

---

---

---

---

---

---

#### Firms that Value Price

- Have a clear purpose, strategy, and position
- Have made pricing a core competency
- Have excellent project management skills
- Understand they sell intellectual capital, not time
- Only work with customers who value them
- Routinely fire low-value customers
- Maintain minimum prices
- Don't treat all customers equally
- Have appointed a value council and/or a CVO
- Have replaced timesheets with Key Predictive Indicators, PM, AARs

---

---

---

---

---

---

---

---

If you just copy, you will always be behind.

At least 84% of us are copying,  
not innovating.

---

---

---

---

---

---

---

---

Don't solve problems;  
pursue opportunities.

Peter Drucker

Implementing Value Pricing  
8. Conduct a Pricing "After-Action Review"

After-Action Review Questions

- How could we have enhanced our customer's perception of value?
- What were the business results and performance against key metrics?
- Did we have the right team on this assignment?
- How high were the costs to serve?
- Did we stay within time and budget parameters?
- Could we have captured more value through higher price?
- If we were doing this type of assignment again how would we do it?
- What are the implications for the way we design and deliver our services?
- What could we do better next time?
