

CPALeadershipReport

Profit Enhancement Bulletin

If there was a possibility that you could increase your tax season productivity by up to 30% or even more, would you invest an hour of your time on the web to explore it?

CPA Leadership in association with XCM Solutions show you how your firm can increase productivity with the staff you currently have. Make your 2006 Tax Season more manageable and less stressful!

XCM is a web-based process management tool that reduces the time it takes to process tax returns, tax notices, financial statements and bookkeeping projects. Firms that have implemented XCM have increased productivity by up to 30% or more. XCM provides remote, real-time access and control of the process, ensuring productivity, simplicity, and profitability...and reduces staff anxiety and burn-out.

"XCM has greatly impacted our business. The improved efficiencies we have achieved with XCM have made us more productive, allowed us to better serve our clients, and eliminated the stress and anxiety associated with our busiest time of year. Our partners, managers and staff can finally maintain a work-life balance during the busy tax season."

***Kenneth Kirkland, CPA, MST, Managing Partner
Kirkland, Albrecht & Fredrickson, P.C***

Is there any reason not to explore the possibilities now?

***Make time to attend this Demo on the Web:
Tuesday, November 29th at 11:00 am EST***
